

Utilizing various processing technologies to produce goods that meet market needs

As one of few comprehensive aluminum manufacturers in the world, the UACJ Group supplies aluminum in various forms, such as flat-rolled products, extruded products, foils, cast and forged products, and precision-machined products. We also process copper for a number of clients. By specializing in the rolling and processing operations of non-ferrous metals, a stable business base has been ensured. Taking advantage of the extensive processing technologies we have developed over the years, we supply products for a diverse range of businesses, while serving newly arising needs as well.

What's **aluminum**?

Aluminum is a metal that will not likely be exhausted

Aluminum is the third most abundant element in the Earth's crust and the most abundant of all metals. It is safe to say that there is no fear of depletion as far as aluminum is concerned.

Precision-machined Components and Related Businesses
