

UACJ Group Basic Environmental Policies

Corporate Philosophy

The UACJ Group is grateful for the Earth's abundance and life-supporting environment. Recognizing that nature sustains all life, we strive to protect the environment and nurture and regenerate nature. We evaluate the environmental impact of current and future business activities across our supply chain, set concrete targets based on those evaluations, and take voluntary, proactive action to minimize our impact and maximize our contribution to protecting the environment.

Guidelines

1. We comply with environmental laws, regulations, and agreements, and institute our own standards for proper management of water, air, and chemical substances.
2. We develop technologies and products that harness the power of aluminum to minimize our impact and maximize our contribution to environmental preservation.
3. We support the goals of the Paris Agreement by advancing climate change initiatives and seeking to reduce greenhouse gas emissions across our supply chain.
4. We take a leading role in advancing a sustainable circular economy by promoting the recycling of aluminum and other primary and secondary materials.
5. We work to conserve, restore, and enhance biodiversity, forests, and water resources based on a full understanding of the value of ecosystems.
6. We actively engage with stakeholders with the aim of living in harmony with nature and local communities.

Adopted August 2014
